

Download A Catalogue Of Meteorites

The Catalogue of Meteorites is the world taxonomic database of all meteorite falls and finds. The first edition was published in 1847 and consisted of a three-page pamphlet listing the 62 Meteorites in the British Museum, the natural history collections of which went on to become the British Museum (Natural History) now The Natural History Museum. The origins of the Catalogue go back to 1847 with a listing of the 62 meteorites of the British Museum. Subsequent periodic updates were issued and in 1923, George Prior, the Keeper of Minerals of the British Museum, issued the first worldwide Catalogue of Meteorites. The well-known 4th edition, edited by Graham, Bevan, and Hutchison was published in 1985. Catalogue of aërolites and Bolides, from A.D. 2 to A.D. 1860 AD2-1499 1500-1699 1700-1799 1800-1829 1830-1845 1846-1860. Continuation or Supplementary Catalogue. Tables I. thru X. Corrigenda et Addenda. These have been applied. This fifth edition of Catalogue of Meteorites will, like previous editions, be the essential reference volume for all those with an informed interest in meteorites.
