On September 5th, John Blake Publishing will release AC/DC In The Studio: The Stories Behind Every Album by music biographer Jake Brown. As described by the publisher: "AC/DC have reigned over rock'n'roll for almost four decades. In November 2012, Live at River Plate was released - the band's first live album for 20 years. Featuring exclusive interviews with producers and engineers, AC/DC in the Studio is the definitive account of the making of the greatest hard rock anthems of all time. Every album is featured in incredible detail, from 1975's TNT all the way to 2008 and Black Ice. Every album is discussed in incredible detail, from 1975's TNT to 2008's Black Ice, which sold more than 1.5 million copies in its first week, making history by debuting at No 1. on album charts in 29 countries simultaneously. The book also covers the making of the Iron Man 2 film soundtrack, AC/DC: Iron Man 2, and includes exclusive interviews with the band's drummer from the 1980s and their engineer of the past 20 years and six albums, Mike Fraser. My final gripe is that this book gives a glazed-over biography of AC/DC, but it does not delve into how they worked in the studio like it should have. Apparently giving detailed information about what type of microphones they used was the thesis behind this book.
