In his discussion of Armageddon, J. Dwight Pentecost has devoted a chapter to the subject, titled "The Campaign of Armageddon", in which he discusses Armageddon as a campaign and not a specific battle, which will be fought in the Middle East. Armageddon is a 1998 American science fiction disaster film directed by Michael Bay, produced by Jerry Bruckheimer, and released by Touchstone Pictures. After discovering that an asteroid the size of Texas is going to impact Earth in less than a month, N.A.S.A. recruits a misfit team of deep core drillers to save the planet. THE YELLOWSTONE volcano has been "intensely monitored" by a team of scientists and volcanologists concerned by a 400-mile-long plume of hot magma that is rising beneath the surface of the Earth.
