In Alberta, the Rocky Mountain Front is about 12 to 19 miles (19 to 31 km) wide. As early as 1935, it was well-recognized that significant coal resources underlay the Rocky Mountain Front in Alberta. As of 2013, about 60 percent of all Canadian coal reserves are believed to be beneath the front in Alberta. Natural gas is also very plentiful. The following op-ed by Hanne Nabintu Herland concerns the Norwegian government's persistent soft spot for the Palestinians. It was originally published in Aftenposten, Norway's largest newspaper, on January 15th, 2013, and has been translated by the author.
