

Download Cave Art And Climate Change

Researchers have attributed broader changes to the region's seasonal monsoon to climate change. Cave paintings are a type of parietal art (which category also includes petroglyphs, or engravings), found on the wall or ceilings of caves. The term usually implies prehistoric origin, but cave paintings can also be of recent production: In the Gabarnmung cave of northern Australia, the oldest paintings certainly predate 28,000 years ago ...Climate change is a change in the statistical distribution of weather patterns when that change lasts for an extended period of time (i.e., decades to millions of years). When we hear the term "climate change," we often think of its negative impact on animals, plants, and mankind. However, we fail to realize that it's not only the living that are threatened by changes in the climate.
