

Download Golden Guide Hallucinogenic Plants

ORCHIDS, a Golden Nature Guide, surveys the fascinating family Orchidaceae - a worldwide group of more than 25,000 different plants. Identified here are some 420 representative species; not only the wild types that exemplify family characteristics and diversities, but also numerous cultivated beauties favored by orchid growers. Many of the psychedelic plants contain dimethyltryptamine, which is either snorted (Viola, Yopo snuffs), vaporized, or drunk with MAOIs. It cannot simply be eaten as it is not orally active without an MAOI and it needs to be extremely concentrated to be vaporized. *Omphalotus olearius*, commonly known as the jack-o'-lantern mushroom, is a poisonous orange gilled mushroom that glows in the dark. by Noah Siegel, August 2007, Randolph Co. West Virginia - from Wikipedia. The Golden Rule. The most familiar version of the Golden Rule says, "Do unto others as you would have them do unto you." Moral philosophy has barely taken notice of the golden rule in its own terms despite the rule's prominence in commonsense ethics.
