

Download Gynaecological Oncology 2nd Edition

This document provides information on the safe administration of intravenous antineoplastic drugs via an intravenous cannula (IVC). Only health care professionals who have attained competency as per institutional guidelines in safe administration, handling and waste management of hazardous drugs should perform this procedure. There are two wards in BHOC (Ward 61 — oncology, Ward 62 — haematology) and two day units (chemotherapy and haematology). There is a combined outpatients department. The radiotherapy treatment floor (LG2) has six linacs (linear accelerators) and a brachytherapy theatre. The building also houses an isotopes unit with 5 single-bedded rooms on an isolation corridor on Ward 61. ESMO Oncology Journals. Our journals offer ESMO members and the oncology community a globally visible platform to publish scientific studies, and a highly credible source of educational updates. Uterine sarcomas are rare malignant uterine neoplasms that are responsible for a large majority of uterine cancer-associated deaths. The subtypes include leiomyosarcomas, endometrial stromal tumors, and adenosarcomas.
