

Download Intelligent Nanomaterials

PerkinElmer's portfolio of state-of-the-art analytical instruments, including Single Particle ICP-MS, powers some of the most advanced nanomaterials research around the world. *Nanomaterials*, an international, peer-reviewed Open Access journal. ICMIM 2018 was successfully held in Sapporo, Japan; ICMIM 2017 was successfully held in Singapore, and all participants enjoyed the conference and academic visit. A simple, liquid-metal alloy formed from gallium, iridium, and tin can be electrically controlled to form complex shapes or run laps in a Petri dish.
