Welcome to Learn ggplot2 using Shiny App! Hello ! My name is Keon-Woong Moon. I am a Professor of Cardiology at Catholic University of Korea, South Korea. We recommend that you start your Shiny journey with our beginner to intermediate tutorials. Then, you can refresh what you learned in the tutorial and learn the lay of the land of Shiny starting with the articles in this section. Introduction. Playing around with PyTorch and R Shiny resulted in a simple Shiny app where the user can upload a flower image, the system will then predict the flower species. Shiny modules are short (well, usually short) server and UI functions, that can be connected to each other by a common namespace, and be embedded within a regular Shiny app.
