Medicine is the science and practice of the diagnosis, treatment, and prevention of disease. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. Here's the function I came up with that was completely based off @SmartManoj answer but has been updated to be cleaner (in my opinion) by using with statements, eliminating unnecessary variable (ie, ones that the keyword argument self explains) as well as yielding the page's text.
