

Download Neural Transplantation Cns Neuronal Injury And Regeneration

Projekte . Es gibt bereits mehrere in der Klinik verwendete Strategien, um die Regeneration von Knochen zu beschleunigen, aber nach wie vor wären neue Wege wünschenswert. After traumatic injuries of the central nervous system (CNS), including spinal cord injury (SCI), astrocytes surrounding the lesion become reactive and typically undergo hypertrophy and process extension. ABSTRACT. The adult mammal spinal cord does not allow axons regeneration. For unknown reasons, the neural fibers fail in coming across the site of the lesion, as if there were no growing from the first try. ?1 ????? ??? ??????????. ????? (?????????????) ?????????????? ...
