""Testing Women, Testing the Fetus is a compelling ethnography of the lived experience of geneticization of American society. It is a deeply human account of the embeddedness of reproductive technologies in fundamental social processes involving gender, class, political economy, and moral contestation. If more women were accurately counseled about what exactly cell free DNA is testing, they would immediately understand that their test results are never diagnostic. Prenatal testing consists of prenatal screening and prenatal diagnosis, which are aspects of prenatal care that focus on detecting problems with the pregnancy as early as possible. These may be anatomic and physiologic problems with the health of the zygote, embryo, or fetus, either before gestation even starts (as in preimplantation genetic ...CDC recommends Zika virus testing for.
